For boys, we like Fendi, Hermes, Louis (Vuitton), Marc Jacob(s) and Michael (Kors). Nothing transfers status like a luxury car. Strap your baby into the fast lane with one of these luxury car-inspired names: Ferrari Infiniti Jaguar Lincoln Lotus Porsche While you can hear some of the same boys' names in the playground now that you heard when you were a kid (hello, Michael and Ryan!), odds are you won't find any girls sporting the names that were popular when you're a kid—for example, I haven't met a single young Jennifer, Lisa or Heather. And it turns out, girls' names tend to fall out of favor much faster—according to findmypast.com, an online genealogy site, they turn around in popularity at least seven times more often than the boys' names. I don't think it's a matter of lack of creativity the boys' side. Here are my theories as to why this is happening: 1. There are more options out there for girls. It looks like there's much less out there for boys - as I discovered when I sought names for my potential son. Especially if you take out all those -aden, aiden and -ayden baby names (which I did). 2. The girls took over so many names. Some names that were only once for boys, such as Casey, Riley, Dana and Kennedy, are more associated with girls than boys — and that means there could be even bigger limits for what's available to boys. 3. I think girls' parents feel more free to be creative with their baby's names. I think parents are more concerned about giving boys a name that stands out (if it can create problems with bullies in the playground), while girls are less likely to have problems with names that are unique. 4. You can't discount the junior factor. While women may be less likely to give their daughters the same names they have, there are always plenty of juniors (and beyond) around — and that means names are passed down by the generations. What do you think? Have you found fewer options for boys' names than girls? Photo: Family by Jacqui Martin/Shutterstock Name is an informal term for a word or phrase that shows a person, place or thing. A noun that calls any one of the same kind or class (for example queen, hamburger or city) is called a common name. A noun that calls a specific member of a class (Elizabeth II, Big Mac, Chicago) is called a proper name. Proper names are usually written with initial uppercase letters. Onomastics is the study of proper names, especially the names of people (anthropocene) and places (toponyms). Etymology: From the Greek, name Pronunciation: NAM Also known as: proper name Jack: I didn't meet your boyfriend. Liz Lemon: His name's Floyd.Jack: It's unfortunate. (Alec Baldwin and Tina Fey in Corporate Crush. 30 Rock, 2007) It's interesting how some names sound good and some sound bad. Names with soft consonants like [m], [n], and [l] tend to sound more beautiful than names with hard consonants like [k] and [g]. Imagine we're approaching a planet, where two alien races live. One of the races is called the Lamonians. The other is called the Grataks. What sounds like the friendlier breed? Most people opt for the Lamonians, because the name sounds friendlier. Grataks sound nasty. (David Crystal, a small book language. Yale University Press, 2010) Who can resist the lure of the extraordinary names of England's towns? High Easter, New Joy, Kingston Bagpuize, Sleeping Green, Tiptoe, Dutch Wallop, Nymphsfield, Christmas Common, Sablesbury Bottoms, Tiemie Intrinseca, Huish Champflower, Buckland-tout-Saints, Wyre Piddle, Martin Husingtree, Norton-Juxta-Twycross and so on, a gazeteer of dreams (Jeremy Paxman, The English: A Portrait of a People. Overlooked, 2000) I fell in love with American names, The Sharp Names That Never Get Fat, The Snakeskin Titles of Mining Claims, The Plowed War-Bonnet of Medicine Hat, en Deadwood en Lost Mule Flat. . . . (Stephen Vincent Vincent American Names, 1927) There is no sharp line of division between common words and proper names. They feed off each other. Many medieval surnames have begun as common nouns, especially those related to occupations: Archer, Baker, Barber, Brewer, Butcher, Carpenter, Cook,, Fisher, Goldsmith, Mason, Miller, Parson, Shepherd, Smith, Taylor, Thatcher, Weaver Some are less obvious today. Trinder? A wheel maker. Fletcher? An arrow maker. Lorimer? A spur-maker. . . . Everyday words can be changed in a place name as circumstances require. The exploration routes of the world are full of such names as Cape Catastrophe, Skull Creek and Mount Pleasant, plus hopeful names such as Concord, Fame and Niceville. The same trend affects streets, parks, promenades, quaysides, markets and all the other places where we live. (David Crystal, Words, Words, Words. Oxford University Press, 2006) The mythical view of language that precedes everywhere the philosophical view of it is always characterized by this indifference of word and thing. Here is the essence of everything contained in his name. Magical powers attach directly to the word. He who gets possession of the name and knows how to make use of it has gained power over the object itself; He made it his own with all his energy. All world magic and name magic is based on the assumption that the world of things and the world of names constitute a single indfferent chain of causality and there is a single reality. (Ernst Cassirer, The Philosophy of Symbolic Forms: Language. Yale University Press, 1953) People like to call things. I don't mean just public transport objects, like locomotives, ships, and aircraft, or the names given to commercial objects by their manufacturers. I mean personal, private names for everyday objects, such as refrigerators, lawn mowers and herds. . . . Back in the 1980s, in a programme for the English Now series I hosted on Radio 4, I asked listeners to send examples of objects they mentioned. I was expecting a few dozen letters. I have hundreds. A man wrote to say his crawl was called Wilberforce. A woman said her Hoover (vacuum cleaner) was known as J. Edgar. At least two garden ships have been called Tardis. There was in the kingdom a waste disposal unit called Wally, a teapot called Herbie, an ashtray named Cedric, and a butter knife called Marlon. Maybe there is still. . . . The principle is clear that, if you have an object that is of particular functional or emotional meaning to you, you give it a name. Often it's a name known only to members of your family. It's part of the 'home dialect' - or 'familiek' - that every family has. (David Crystal, By Hook or by Crook: A journey in search of English. Overlook Press, 2008) The effect was a bit like that provided by people who are in conversation constantly using the first name of the person they speak: you can go years without taking it on, but once you do, it is difficult not to be distracted by in fact, not to feel that it's specifically meant to make you crazy. (John Lanchester, Capital. W.W. Norton, 2012) Taboos on the use of personal names are reported in a wide range of cultures. The details vary from language to language, but it's common for people to be reluctant to reveal their own real names. In many small-scale societies, names are not used much. Instead, people are often addressed or referenced by kin terms such as 'son' or 'father's sister.' In some societies, people have two names, a 'real' name, keeping them secret, and an extra name or nickname disclosed to outsiders. In other societies, people will turn to a third party to announce their name when someone asks, because there is a taboo about the utterance of one's own name (Frazer 1911b:244-6). (Barry J. Blake, Secret Language. Oxford University Press, 2010) Why not have these guys named Allen, Allyn, and Alan come together and decide how . . . to spell their name? I'm tired of guessing. Same with Sean, Shaun and Shawn. Stop with all these cute attempts to be different. If you want to be different, call yourself Margaret Mary. (George Carlin, when will Jesus bring the pork chops? Hyperion, 2004) 2004)
